1 Toward a lexicon of musical APL2 phrases (invited)
Stanley Jordan, Erik S. Frils
July 1991 **ACM SIGAPL APL Quote Quad , Proceedings of the international conference on APL '91 APL '91**, Volume 21 Issue 4
Publisher: ACM Press
Full text available: 📄 pdf(329.17 KB) Additional Information: full citation, abstract, references, index terms

> Both the programming environment and the notation of APL2 have proven useful in music theory and computer music. APL2 expressions can generate, test, and modify data structures representing musical syntax (actual passages or songs) or musical semantics (facts, ideas, or relationships in music). In this paper our primary concern is syntax-oriented. We examine a few basic parameters of music, introduce data structures that capture essential features of these parameters, and explore some useful exp ...

2 Heuristic approach for generic audio data segmentation and annotation
Tong Zhang, C.-C. Jay Kuo
October 1999 **Proceedings of the seventh ACM international conference on Multimedia (Part 1)**
Publisher: ACM Press
Full text available: 📄 pdf(1.82 MB) Additional Information: full citation, abstract, references, citings, index terms

> A real-time audio segmentation and indexing scheme is presented in this paper. Audio recordings are segmented and classified into basic audio types such as silence, speech, music, song, environmental sound, speech with the music background, environmental sound with the music background, etc. Simple audio features such as the energy function, the average zero-crossing rate, the fundamental frequency, and the spectral peak track are adopted in this system to ensure on-line processing. Morphol ...

> **Keywords:** audio content anlaysis, audio database management, audio segmentation and indexing, heuristic rules

3 A beat tracking system for acoustic signals of music
M. Goto, Y. Muraoka
October 1994 **Proceedings of the second ACM international conference on Multimedia**
Publisher: ACM Press
